

JLG Forklift Part

JLG Forklift Parts - Following retirement in the late 1960's, John L. Grove started out on a cross country RV trip. After spending many years establishing his family built crane company with his brother, John had no idea that this journey would bring forth the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision materials handling equipment was the end result of a road trip.

During their trip, John reacquainted himself with previous business acquaintances along the way. In combination with these conversations and a noteworthy event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a considerable market for a product that could quickly and securely lift people in the air to accomplish upkeep and other building services.

After returning from their vacation, John set up a partnership with two of his friends and bought a metal fabricating business in McConnellsburg, Pennsylvania. Opening with a small crew of twenty staff, they fashioned and sold their first JLG aerial work platform in 1970. The business incorporates many of the basic design essentials of that original lift into current versions.

JLG forklifts have come a ways from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Today, the company proudly continues to expand itself into many markets worldwide and develops new products to make sure clients are capable of being more effective and perform in the workplace within a safer atmosphere.
